

DRYING OVENS

Portable Drying Oven

Our portable drying oven provides a greater storage and heating capacity than the standard quivers. This unit measures 175mm wide, 610mm deep and 210mm high (260mm high including handle).

Capable of storing up to 15kgs of stick welding rods, this unit is 'Dual Voltage', so can be used on either a 110v or 230v single-phase power supply.

The thermostatically-controlled 300 watt (approx) heater is variable and can heat the rods to a suitable temperature between 100°C and 300°C.

Stationary Drying Oven

Our most industrial solution for ongoing storage and heating of stick welding rods, the stationary drying oven has the capacity to accommodate up to 136kgs of rods.

Two, thermostatically controlled, variable heaters, all with 3 interior shelves for practical, organised storage are available; Our standard, 1500 watt (approx) type, available in either 110V or 230V, that can heat the rods to a suitable temperature between 100°C and 300°C, or our 2250 watt (approx), 230V model for heating rods at a higher temperature of between 0°C and 400°C.

All ovens measure 530mm wide, 620mm deep and 620mm high.

ZMR100240	230v Stationary Drying Oven 100°C - 300°C	1,298.05
ZMR400240	230v Stationary Drying Oven 400°C	1,958.50

Electrode Quiver

A commonly used product for transporting, dispensing and storing your stick welding rods in warm, dry conditions prior to welding.

This model has a 150 watt (approx) heater that can warm the rods to between 80°C and 100°C and improve their welding performance. 5kg rod capacity.

The carrying handle also serves as a stand for the quiver to rest on. Versions are available which use a 230v or 110v supply; the 110v is ideal for site use.

Rod Guard Cannisters

A range of airtight cannisters providing great storage and protection for all your welding electrodes, rods and filler metals. Certified chloride-free and features a threaded cap with long-lasting neoprene seals to prevent contents being in contact with atmospheric moisture. Built from high-impact polyethylene. Available in 14in, 18in, 36in and 1m length versions. High-Temp models are heat-resistant up to 450°C. A wall rack to store 3 cannisters is also available.
