

PRODUCT INFORMATION

HEATING EQUIPMENT

BG5143

DESCRIPTION

Single-stage plugged propane regulator with 5/8 BSP bull-nose (inlet) and 3/8 BSP outlet. This model features left-hand threaded fittings. Works with standard propane bottles and the fitted propane hose to deliver a suitable propane supply to operate the range of heating torches, as detailed below.

INFORMATION

The Weldability range of heating equipment is designed for use with propane gas in a diverse variety of applications which range from the pre-heating of metals to flame cleaning and paint removal.

The Weldability range of Heating Equipment is designed to be used at a maximum pressure of 4 bar. Use of the equipment at pressures in excess of this limit is unnecessary and dangerous.

Use of the above regulator is required to 'step-down' the bottle pressure of the propane gas to a suitable working pressure of less than 4 bar.

Meets relevant European Norms.

TECHNICAL INFORMATION

For Use With:	Propane
Regulator Type:	1-Stage, Plugged, Inc. P/A.
Inlet Connection:	5/8" BSP LH Bull-Nose
Outlet Connection:	3/8" BSP LH

Suitable for use with the following torches:

BG105-45L: Heating Torch 45mm with Lever
BG109-SF: Heating Torch 17mm inc. Burner
BG111: Heating Torch 60mm with Lever
BG312: Heating Torch 60mm inc. Piezo
