Professional welding technology

for industry

The Newarc WFU12A-ILS wire-feeders have been designed with increased environmental protection. They are built into a strong, durable plastic case using Zinc coated chassis components to give both great strength and protection when used in damp conditions.

Our in-line MIG feed unit operates from the OCV of any DC welding power source, without the need for control cables.

The simple front panel layout allows for ease of set up on CC or CV mode, and all functions are directly accessible by the multi function control knob and water proof push buttons.

The WFU12A-ILS wire feed unit is designed to work with any welding power source working in constant current or constant voltage mode.

Main features
