

PRODUCT INFORMATION

Strip Welding Curtain

ECP26290291
ECP26250291

SUMMARY

Strip Welding Curtain is a 300mm wide x 2mm thick PVC. It is available in green or amber PVC and conforms to EN1598 so are ideal for use in welding applications, to protect from UV, sparks and spatter.

TARGET APPLICATIONS

Our strip welding curtain is used to protect working areas that require flexible access and is supplied by the meter from 50m rolls. The strip can be cut to length, punched and eyeleted allowing it to be hung from a supporting frame and tailored to any configuration.

FURTHER INFORMATION

Welding strips are self-extinguishing and therefore withstand welding sparks. They are, however, not suitable as a welding blanket and do not withstand open fire and intense heat. Welding strips offer visual protection against dangerous radiation but are not suitable for supervising welding works or as a substitute for welding helmets.

Custom, made-to-order, curtains are also available on request.

ARTICLES & ACCESSORIES

Part Number	Product Description
ECP26290291	Green Welding Strip
ECP26250291	Amber Welding Strip

TECHNICAL SPECIFICATION

Specification	EN1598
Width	300mm
Thickness	2mm
Maximum Length	50m
